ZeroTrain.Ai

Knowledge-Based Inference for Real-Time Decisioning

Product Introduction

By Leonard Gambrell

Overview

ZeroTrain.Ai delivers a complete, knowledge-based AI ecosystem built around three powerful products — **Inference**, **DataForge**, and **RuleForge** — designed to work together without the need for traditional model training. Each focuses on a different part of the symbolic reasoning process, turning knowledge and data into real-time, explainable intelligence.

> **Inference** transforms rules into instant, confidence-scored answers.
> **DataForge** produces synthetic data at scale, guided by your existing rules.
> **RuleForge** extracts logical rules from data to power inference.

Together, these products create a transparent, deterministic AI workflow where your knowledge defines the outcome. ZeroTrain.Ai makes symbolic intelligence accessible, fast, and dependable from day one.

ZeroTrain.Ai : Products

🧠 Inference	🔨 Data Forge	📏 Rule Forge
Transforms rules into instant, explainable answers with confidence scores	Produces synthetic data at scale guided by your existing rules	Extracts logical rules from data to power ZeroTrain inference
Input → **Rules**	**Rules**	**Data**
Output ← **Answers**	**Data**	**Rules**
